DETAILED ACTION

Response to Amendment

1. Amendment filed January 20, 2004 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites a "closed nozzle type fuel injector" in line 1. The recitation of "type" renders the claim indefinite. MPEP 2173.05(b).

Claim Rejections - 35 USC § 102

5. Claims 12, 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Stevens (6,053,432).

Stevens discloses a fuel injector comprising: a substantially tubular retainer 18; a nozzle housing 10; an interference fit (column 2, lines 29-31); a coolant jacket sleeve

19.

Claim Rejections - 35 USC § 103

6. Claims 13, 14, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens (6,053,432).

With respect to claims 13, 14, 16 and 17, Stevens discloses the limitations of the claimed invention with the exception of the ranges of the interference fit. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided an interference of 0.001 to 0.0006 inch for optimization dependent on application criteria, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

7. Claims 12, 15 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (6,000,638) in view of Stevens (6,053,432).

Martin discloses a fuel injector comprising: a substantially tubular retainer 186; a nozzle housing 182; an interference fit (column 4, line 63). Martin discloses the limitations of the claimed invention with the exception of a plurality of injection holes. Stevens discloses one or more outlets 14 to spray fuel. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided a plurality of injection holes in the device of Martin as taught by Stevens to increase fuel dispersion.

Regarding claim 18, the recitation "the nozzle shank is press fitted into said engagement opening of said nozzle support portion" renders the claim a product by

process claim that achieves the interference fit. The recitation "press fitted" has not been given patentable weight. MPEP 2113.

Response to Arguments

8. Applicant's arguments with respect to claims 12-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
